

CyberSkill Design System Audit Framework

The open-source standard for measuring, scoring, and systematically improving enterprise design systems.

\$4.3 Trillion Is Spent on Enterprise Software. Nobody Measures the Design System Under It.

No standard

There is no vendor-neutral framework for scoring design system health — teams invent bespoke spreadsheets every time.

AI amplifies debt

LLM-assisted UI development accelerates inconsistency faster than teams can manually review.

Compliance risk

WCAG 2.2, the EU AI Act, and Vietnam PDPL are now legally binding — most design systems have no mapping.

Invisible quality

Executives cannot invest in quality they cannot see. Without a score, design systems remain perpetually underfunded.

A Vendor-Neutral, AI-Native Audit Standard.

What the framework does

125 scored criteria across 20 categories (Part A: system quality · Part B: UX quality)

5-tier maturity model: L1 Initial → L5 Optimised

AI-native: LLM prompt packs for SCAN, FIX, research, and plan modes

MCP server exposes tokens + doctrine to AI agents

Built-in WCAG 2.2, EU AI Act, Vietnam PDPL mapping

No-downgrade rule: scores cannot regress without co-auditor sign-off

Open-source, vendor-neutral, hosted at audit.cyberskill.world

125

criteria

20

categories

5

maturity tiers

3

audit modes

Every Company With a Design System Is a Prospect.

TAM — Global Design System Market

Enterprise software design tooling (2026 est.)

\$4.3B

SAM — Design System Audit & Ops

DesignOps, QA tooling, compliance tooling

\$620M

SOM — APAC Enterprise (Y1-Y3 focus)

SEA + India mid/large-cap product companies

\$38M

Regulatory tail-wind: PDPL + EU AI Act + EAA mandates make design system compliance non-optional.

Open-Core. Enterprise Revenue on Top.

Free	Pro	Enterprise
\$0	\$299/mo	Custom
Full 125-criterion framework	All Free features	All Pro features
LLM prompt packs (SCAN/FIX)	Hosted dashboard + trend tracking	White-label + SSO + SAML
Community audit report templates	Auto-generated improvement plans	Compliance exports (SOC 2, ISO 27001)
GitHub open-source	Priority support	Dedicated success engineer

Dogfooded. Proven. Live.

Apr 25, 2026

v1.0 locked

38 components · 29 doctrine chapters · 11 npm packages (React, Vue, Svelte, React Native, MCP server...)

Apr 27, 2026

First audit complete

74.7% → 84.6% (+9.9pp) in a single cycle. L5 Optimised. 7/7 enterprise thresholds passed. 0 regressions.

Apr 28, 2026

Built by Engineers Who Ship Production Design Systems.

CyberSkill — Software Solutions Consultancy & Development

Founded 2020 · Slogan: Turn Your Will Into Real · Domain: cyberskill.world · GitHub: [cyberskill-official](https://github.com/cyberskill-official)

10 full-time engineers, 100% remote, Vietnam-based · 2 active long-term enterprise projects

Design Systems

Designed and shipped CyberSkill DS v1.0 — 38 components, 11 npm packages, multi-framework

AI Integration

MCP server, LLM prompt engineering, Claude API, AI-native audit workflows

Compliance

WCAG 2.2, Vietnam PDPL, EU AI Act, SOC 2 readiness built into product architecture

Full-stack

React 19, TypeScript, Node.js, GraphQL, PostgreSQL/pgvector, Vite, Tailwind v4

The Regulatory Clock Is Running.

Jan 1, 2026

Vietnam PDPL (Law 91/2025 + Decree 356)

Consent-first, granular, extraterritorial. Fines up to VND 3B.

Feb 2, 2025

EU AI Act — prohibited practices in force

AI transparency + human oversight requirements live NOW.

Jun 28, 2025

European Accessibility Act enforcement

EN 301 549 / WCAG 2.2 AA is law across the EU.

Aug 2, 2026

EU AI Act — high-risk obligations

High-risk system audits, data governance, logging mandatory.

Dec 22, 2024

Vietnam Resolution 57-NQ/TW — digital policy

Political mandate for digital transformation across SEA.

Teams that don't build compliance into their design system today will be refactoring under legal pressure tomorrow.

Join Us in Making Design Systems Enterprise-Grade.

Programme support —

Accelerator resources to reach enterprise design teams in SEA, APAC, and Europe

Network access —

Introductions to DesignOps, VP Engineering, and CTO-level contacts at target enterprises

Strategic guidance —

Support navigating enterprise sales cycles, compliance frameworks, and global go-to-market
